

Title: Breaking Barriers Through Robotics
Team Members: Megan Jacob, Vrinda Bansal,
Ruhi Bansal, Sneha Menon, Jia Jain, Nikhi
Gandham
Team Number: 2772J
Location: San Ramon, California

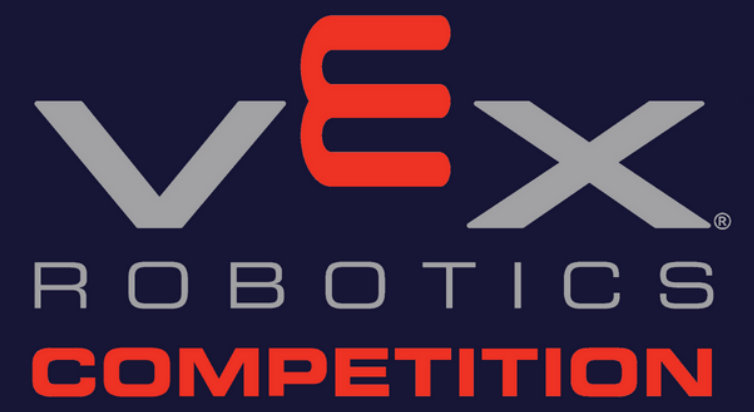

Poster Description

This poster showcases the various elements of VEX Robotics that our team enjoy most. We are a team that was founded over a year ago on the basis of creating an inclusive and supportive robotics community. Our team, as an all-female team, is breaking barriers in the STEM world, showing people in our community that girls can succeed in STEM. We also run an apprenticeship program, that is highlighted on the poster, to encourage girls to try out STEM. Our team also enjoys participating in competitions and has won the Inspire award at Worlds and numerous other awards.

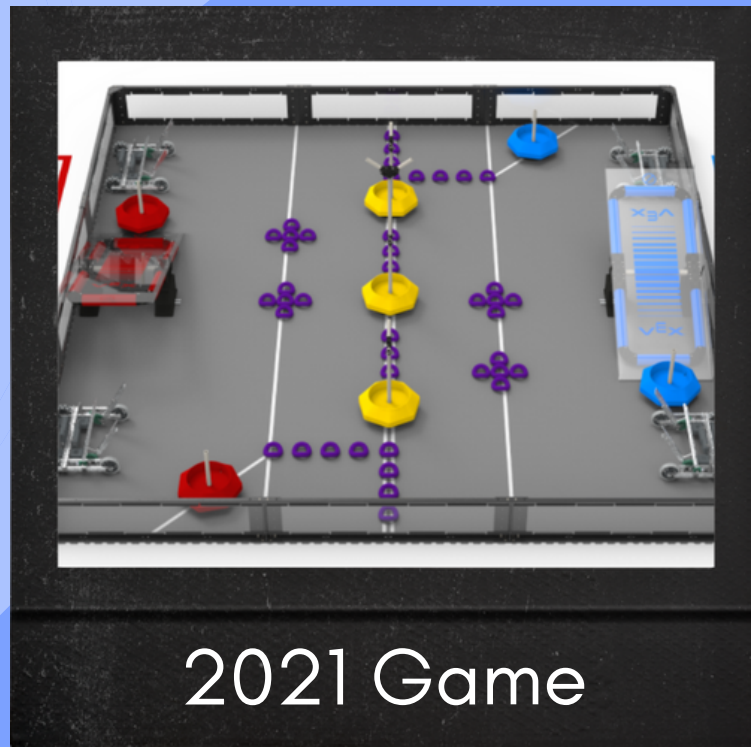

How the Poster was Created

The poster was created using Canva, an online designing tool. Images were taken from VEX's website and challenge videos or are pictures of our team and our programs. The poster was designed and created by one of the team members (Megan Jacob).

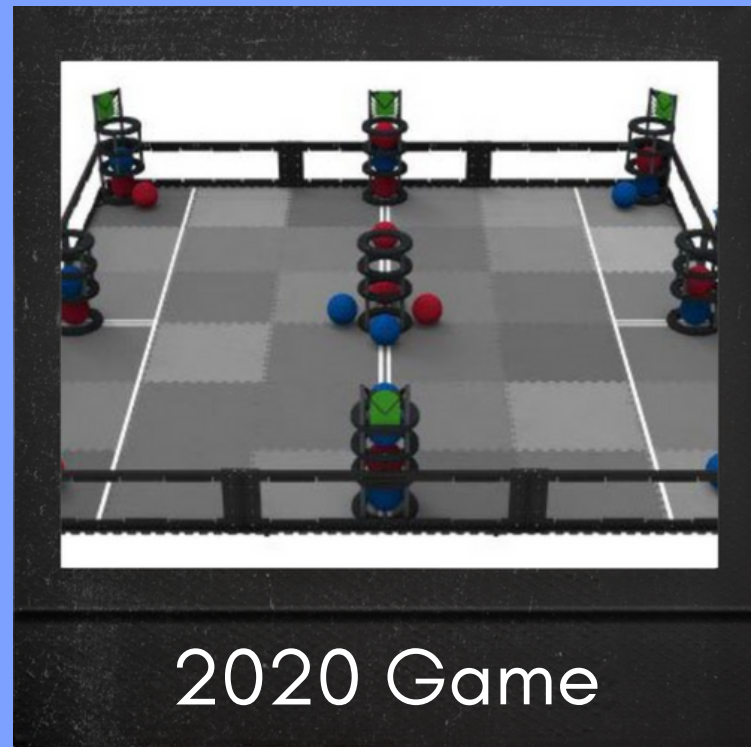

BREAKING BARRIERS THROUGH ROBOTICS

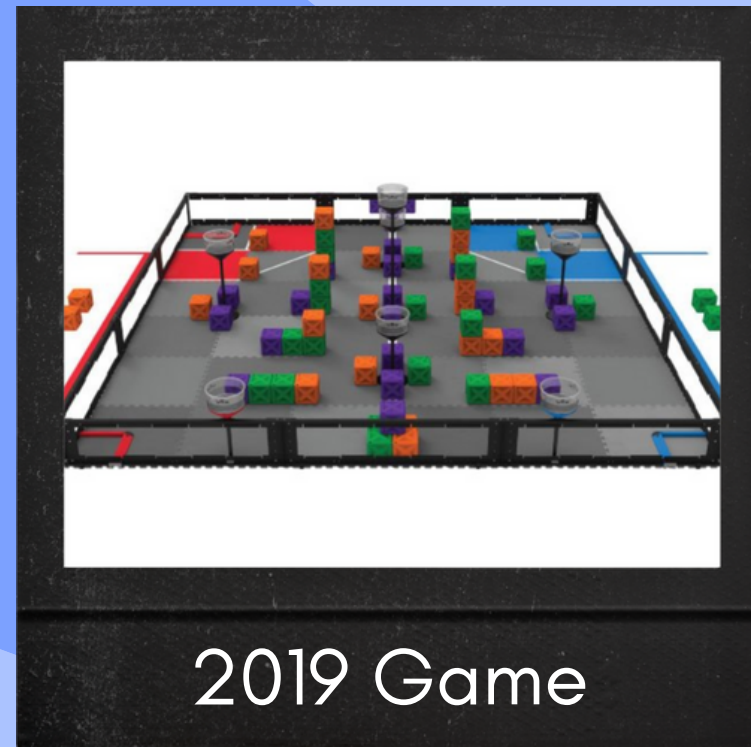

Innovating robotic solutions to fun new challenges each year!
