Team Pelican, 98577a

Northshore Robotics, Mandeville, Louisiana

I decided to make a poster that shows multiple photos and things about our club. We are Team Pel-i-can 98577A from outside New Orleans. Our poster shows the Pelican logo we made out of vex parts. Our inspiration for our team name and logo was the New Orleans Pelican basketball team. I also included photos of our group practicing at Just For Kicks (JFK), competing in virtual world's last year, taking apart a robot vacuum (ROOMBA) to see how it works, a group photo with our robots, and our team photo from last season showing our accomplishments. I also put a picture of myself in the middle of two different robots, one I made myself from Vex parts to look like one I got as a Christmas present. One robot is VEX, and the other is a non-vex robot toy. I also made a code that tells what the club is about. It says...have fun, be you, try new things, to learn from your mistakes and to make friends!
