

WE NEED YOU!

WHAT?

VEX Robotics is a robotics program that is centered on creating annual **game-based engineering challenges** targeted towards teams of 4-7 students from elementary (VIQC) through University (VEXU) to **stimulate collaboration in tackling real-world challenges.**

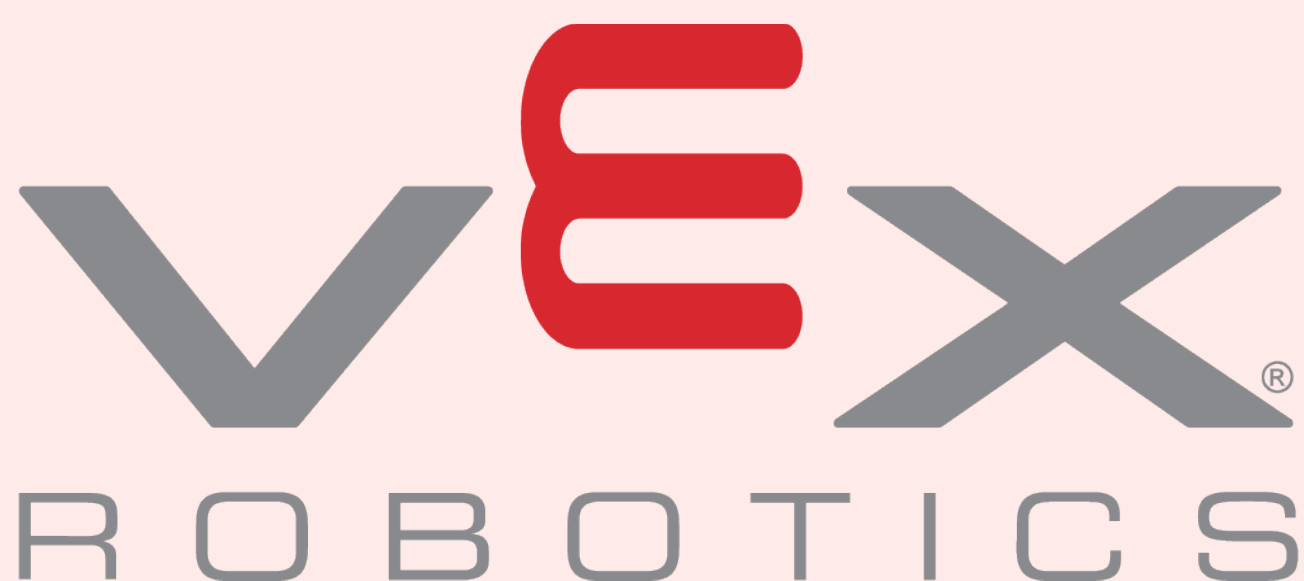

WHY CARE?

The technological focus of today's world has made skills such as **programming** and **utilizing CAD software crucial** to success in the workplace. The VEX Robotics Program has helped us, as well as thousands of other young innovators around the world **develop these passions.** We have **made lifelong friends,** united by **our ambition to grow and succeed.**

ITS IMPACT

VEX Robotics is more than just building robots for competition. It's about going **outside of your comfort zone,** establishing **meaningful connections,** and truly immersing yourself in the **journey of adversity, problem-solving, cooperation, and success.**

So, whether you are a student, teacher or mentor...
**Get Involved in the
VEX Robotics Program
Today!**

Build the Future.

Inspire. Innovate. Grow.
