

Join Robotics

Robotics is a competition where we learn to network and create groups of life long friends where we can grow our skills in the stem field

WHAT DOES ROBOTICS MEAN TO YOU?

Robotics is not only a competition, but a community where I can build skills and work as a team

EXPERIENCE

My experience in robotics is that I learned stem skills such as programming and building. I was able to work with my amazing team and work as hard together as a team.

I have had an amazing experience in robotics throughout the years and I've gained many new skills through it

I learned all different aspects in robotics like the information in the engineering notebook, programming, building, and communication skills
