

Team Number: 7481C

Title of Submission: Bring a Wrench

Names of Student who Participated:

Gilbert – Designed the graphic on the left side

Audrey- Wrote the story telling essay and drew the wrench

Debra- Drew the team robot graphic in the bottom right hand

Thatcher- Built the robot that was drawn and arranged the pictures to accompany the graphics

Location of the Team: League City, TX

Description of the Poster:

We **understood** that we wanted to inspire everyone to be a part of Vex robotics, so we **explored** each of our favorite parts of it and wrote an essay. We **defined** our love of building, competing, and making new friends by using **ideates** such as adding pictures of teams we competed with, a drawing of a **prototype** of a robot, and a story to reach others. We **chose** to use Gilbert's awesome graphic design, Audrey's amazing storytelling capabilities, Debra's superb drawing skills to diagram, and Thatcher's keen eye for photos to make a fantastic poster. We needed to **refine** our photos to make sure we included different aspects of Vex to include competitions, meeting new friends, awards, the VRC and IQ fields, and mentorship. After **presenting** our poster to others, we got good feedback that we **implemented** to make the poster look more cohesive. We **tested** this poster by trying to get other people to join a local high school team and will **iterate** this until we get everyone to be a part of an amazing organization.
