

## IRHS Winters Chapter

**The International Robotics Honor Society (IRHS) is an honor society founded in 2021. Our goal is to raise awareness of STEM by encouraging younger students to engage in STEM activities. By participating in robotics programs and service projects, members of IRHS can truly light up the future of science and engineering!**

Meet the Group

Jesus Cruz

Hi I am Jesus. I am a Junior and I am interested in robotics and Engineering. I like these things because it is a place where i can let my imagination run free and build things. A few things that robotics have done for me is teach me perseverance, to have a good work ethic, and it helped me make new friends.

Jack Tuel

Hi my name is Jack and I'm a Sophomore in Winters High School. I am interested in building robots, and I'm in engineering because its fun.

Ben Nelson

Hi my name is Ben and I'm a Sophomore in Winters High School. I am interested in video games, robotics, and Rubik's cubes, and I'm in engineering because it is a fun and challenging activity I can do that makes me smarter and allows me to expand my horizons.

Celeste Garcia-R.

Hi my name is Celeste and I'm a Senior at Winters High School. Things that interest me include art, animation, engineering, and coding. I'm in engineering because it's a way I can express myself. There are multiple solutions to a single problem, like when building a competing robot for a vex game.

# Focus of the Project

The focus of our project is to educate and inspire younger students, especially girls, about the possibilities and opportunities of engineering. Our chapter selected this project because in our town, virtually no girls enter the engineering classes in high school; the current ratio is thirty to four. In a small agricultural town, the new engineering program at our school is often overlooked by students and adults alike.
