

“Thinking Process” by Team 453X

The first thing that came into my mind when my team and I talked about VEX is my team, 453X; specifically, it is the teamwork and the engineering process that we undergo. When designing this poster, I chose the theme to be "thinking process", thus I used gears to represent our minds thinking of an engineering process.

When our team and all students participating in the VRC think about the engineering process, we do not only think about how to build or program to succeed in the game of VRC. In the process, we are also problem solving using the “thinking process” used by scientists and astronauts!
