

VEX Robotics: An Environment to Learn, Grow, and Play

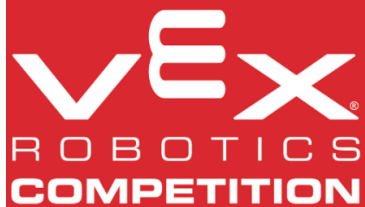

By: Rohan Krishnamoorthi

Team 5327V

Dublin, CA

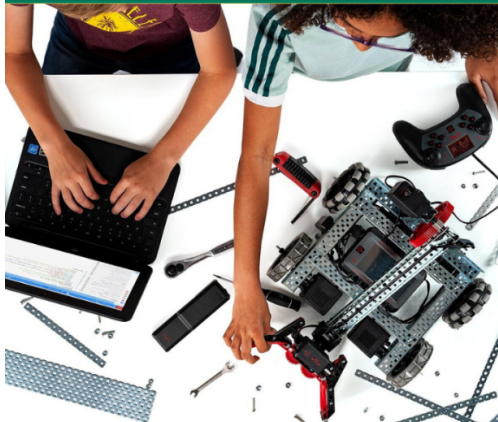

Poster Description:

Our poster contains the 3 key points of VEX Robotics Competition that we feel are improved and developed in our time in VEX VRC: visualization skills, innovation skills, and interpersonal skills. These 3 points are used to advertise the benefits of joining VEX VRC in our poster. We designed our poster using the popular online graphic design company, Canva. Our poster splits up the 3 key points horizontally, starting with visualization skills, then transitioning to innovation skills, and finally ending with interpersonal skills. Each section has an accompanying image alongside that we thought best depicted the skillset that is learned through participating in VEX VRC. We have also added 2 VEX VRC logos in order to fully advertise joining VEX VRC.

Join VEX Robotics Today!

IMPROVE visualization skills! The materials of VEX Robotics allow members to visually construct complex robots and systems analogous to modern-day innovations.

DEVELOP innovative thinking! Many facets of VEX Robotics, such as coding, building, and creating 3D models of robots allow members to pursue inventive, new ideas that are implemented in complex and challenging ways.

CULTIVATE interpersonal abilities! Working together as a team, members develop their collaboration, problem solving, and communication skills, and use these new abilities to further their success in VEX Robotics.
