

Festive Frenzy

By Christopher Reimer of Team NXS

Last year, your neighbours had an amazing display up for the holidays. They went all out, and compared to them, your decorations looked quite measly. Your in-laws were especially disappointed, and you'll do anything to impress them. This year, you're going all out to make sure that your decorations are the incredible ones.

The mobile goals are now trees, and are worth points for being in your yard, and even more if they're set up properly (balanced on the platform).

Rings are ornaments, and you get points for having more ornaments on your trees, and more points for not having them all at the bottom of the tree.

Robots are cars, and you get a few nice bonus points for parking your car at the end of the match.

Textures used for renders:
