

"EXCELLENCE"

By Chakrearsey Prom I 1082X I Lucas, TX

The poster design portrays three major roles found in VEX Robotics: Building, Programming, and Documentation. In VRC, excellence is for a team that is able to present themselves strongly in all categories. This design's message defines excellence as the process of hardworking individuals with the mindset to keep going and to strive for greatness. The code, the bot, and even the notebook all embodies the time and effort put by the students. The visuals are made to intrigue the viewers and the text further clarifies the message.

Excellence.

It never stops
