

VEX U – Poster Design Online Challenge

Raider Robotics – MSOE1 Presents

From Milwaukee, Wisconsin

Recruitment Poster

Kayla Yakimisky

This poster is intended to be put up around MSOE's campus in multiple sizes. The purpose of it is to be eye-catching to pull people to look at it. Then, the many facets of our team are prominently displayed so that it is clear that nearly anyone with any interest in STEM can be involved in our team. Additionally, we advertised our World Championship win as a way to attract people who may be skeptical of our competitiveness. This is also a way to attract people who may not have much interest in robotics. If they see that we are World Champions and have many facets to our team, they may give us a try. On top of all of that, we provide a simple QR code for people to sign-up in a simple and fast way.
