

# **VRC - POSTER DESIGN CHALLENGE**

**Team: 1002T [ LETHAL PRESENCE ]**

**Team Location: Templestowe College,  
Templestowe Lower, VIC, Australia**

**Students involved: Thomas Radford and Jack Greaterox**

We wanted to create an inspirational poster that would promote Vex Robotics in a strong and passionate way. We started by looking at a movie poster template from Canva. This is where we got the image of the robotic hand and the font for "VEX ROBOTICS". We replaced the background with a moon and added the surrounding words which describe Vex Robotics. With simple and bold text at the bottom we displayed the link to the Vex Robotics website.

We really like how the finger is pointing to "ROBOTICS" as we believe Vex is a pathway towards the future of robotics, as they are inspiring students to continue robotics further into their education. The addition of the moon also represents how humanities exploration deeper into space will rely on robotics and that understanding of robotics is important from a young age.
