

Love and a Little Nuts

Nikon D700, F-Stop 0, SS 1/80, Lensbaby tilt shift lens

Hazel Gibbs Team 60004Z

Arlington Heights, IL

I used my mom's camera and tried a fisheye, zoom, and tilt shift lens to tell the story. I chose the tilt shift because it captured the moment perfectly. The full caption for the image is "We love robotics, but sometimes it makes us a little nuts!" because the composition is a heart shaped nut surrounded by various other nuts and gears. The heart and the gears symbolize we love robotics, and the nuts in the bowl show the variety in our team members and that sometimes we get "a little nuts" when things don't go right.
