

My photo is of the *Democracy Steps* by Akio Hizume. These stairs lead to Cedar Falls in Ohio's Hocking Hills State Park. The length of its steps were ascertained from the Fibonacci lattice, which itself is tied to the Fibonacci sequence. Like in the famous mathematical concept, seasons of VEX add with those previous to create something even greater whenever one partakes in robotics. This idea is conveyed by the game elements from past seasons of both IQ and VRC, representing my personal journey.
