# Robo Raiders Poster

Odin Provost

603B ~ I Don't Know

Belmont, New Hampshire

I made this poster in Canva. The robots in the pictures are ones I've built in the past. The middle robot is a recreation of a mouse droid that I built for fun. The first program picture was from my first year of VRC, Tower Takeover. The second picture is of my current driver control code. For the competition pictures, I used the WPI WAVE and the Belmont Bot Bash logos, along with a VEX logo.
