Poster Description

As per the criteria, we created a poster that encourages supporters, teachers, and students to join robotics. Then, we added an inspirational quote that could inspire audience to join robotics. Then, we added text and that highlighted the traits that you can acquire by joining robotics. These highlights made the poster more visually appealing. Next, we put in a website link to show students, teachers, etc how to join robotics.

Design Process

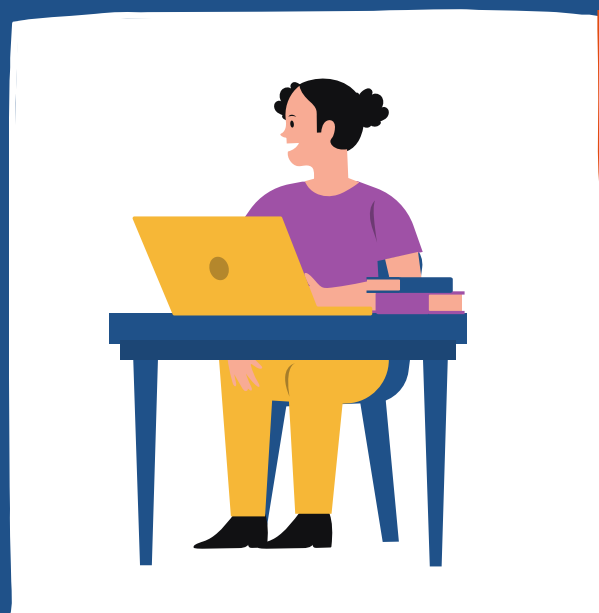

Ask

We figured out what we had to do for the poster challenge. We also looked at our criteria.

Plan

We created a draft on paper. In this we added things such as text, sketches, etc.

Research

We looked at other recruitment posters especially robotics ones

Create

We created the digital poster on Canva including digital pictures.

Imagine

We brainstormed ideas for the poster such as theme, quotes, pictures, etc.

Improve

We tweaked the text, did our finishing touches, and voila!
