Team 75575A - Vortex

Plainfield, Illinois

Hello, we are Team Vortex, 75575A! The members of Vortex are Siddharth Karuturi and Adhya Karuturi. We are siblings from Plainfield, Illinois. This is our inspiration for other students to join Vex IQ.

For our poster, we first thought of traits that describe Vex robotics. We thought of giving students a brief introduction to Vex IQ and explain how it helps kids explore different fields of engineering later on.

Our robot was built with lots of hope, laughter, and hard work. We thought of adding pictures of our robot because it tells students that there are wonderful possibilities in participating in this program.

In conclusion, we hope that many students get inspired by our poster and support the Vex community.
