

Team 33334B

Did you know that many people don't even know what robotics is! Robotics is a hands-on learning platform that anyone can join. Most people that do robotics end up having high-end and good paying jobs in the future because of the skills that robotics possess and teaches you.

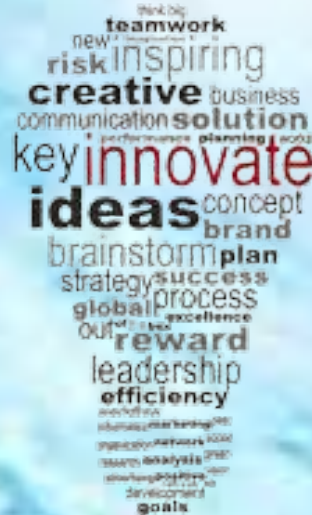

Innovation

To succeed in robotics you need to be innovative and create new and better ideas. Thinking outside the box to optimize things is going to pay off just like it will in real life.

Teamwork

All of the best robotics teams have everyone pitch in to work hard on the robot. Working effectively in a team is something that is needed all through life and robotics can help further develop your teamwork skills.

Perseverance

Sometimes in robotics you aren't the most successful at first but you push through and try and find a way to make your robot better. Being able to make build upon your mistakes and keep going is another valuable trait to have in life that robotics can help improve.
