I Want You to Join Vex Robotics - Poster Challenge

Baldwin Arts and Academics Magnet School

My poster encourages people to join Vex Robotics by creating a poster similar to Uncle Sam's "I want you to join the US army." With one simple and bold sentence in this poster, it urges people to help the team by joining Vex Robotics.

I edited this poster by using a software program called Gimp and Canva. The images that are used for this poster are from Lexica, which is a website that gives A.I. generated images. Lexica is both free to use and for commercial use also. I added the texts in the poster with a font named "Lexend" using a bold option to make the texts catchy to the eyes. Additionally, I put the white rectangle frame around the poster to make it neater and cleaner. Finally, I changed the poster image resolution to over 300 dpi and I was finished.

These were the steps and thoughts that I had when I was making my Vex Robotics poster.
