

Vex robotics Poster Design 2023

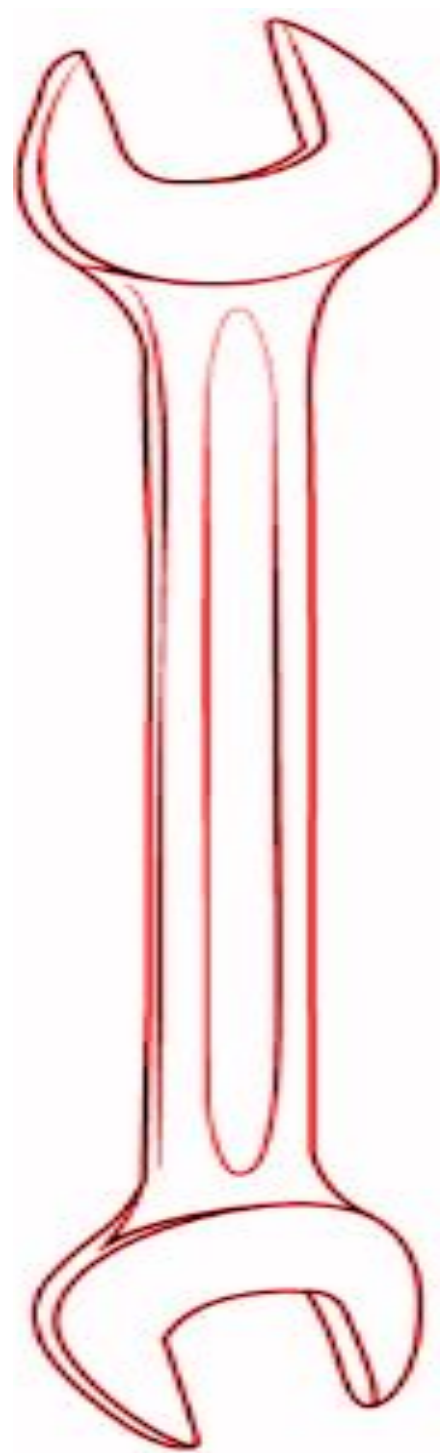

By: Hailey Marmon & Conner Smith Team 4073A

JOE WALKER VEX — Jets

The colors that were used are red and blue because those colors represent the Joe Walker school colors. The border used represents pieces of our competition robots. The robot is used to add a little robot feeling to VEX robotics title. And the title is used to represent the name of our school.

- **Why should you join vex?**

People should join Vex because you get and learn many new things out of it. You learn how to be more responsible, leadership, and communication. It is also very fun. You collaborate with new people including other teams you meet and have to team up with.

Quartz Hill, CA

Team: 4073A

- **What is vex?**

Vex robotics is a safe space for teens, young children, and adults for their mind to come to life. Vex teaches you many things and lets you meet amazing people. Your mind continuously blows up with new ideas for your robot and new add-ons. Vex to us is very important. We've learned as a team to work together, built new ideas, and many more.
