Unleash your Creativity Our Process...

We gathered together and brainstormed ideas for our poster, we thought about what would inspire students to join robotics **VEX IQ**.

Using google drawings, we created our poster by thinking creative. We added pictures, persuading text, and color to make it attractive towards students.

We presented our finished poster to others and got feedback on what we could improve to make it more persuasive and colorful.

We looked back at our original design and made our final changes. Our teacher pointed out it didn't pop out enough, we changed the color scheme and ended with our final results.
