

VEX ROBOTICS: Will YOU Rise to the Challenge?

This poster is a brightly colored promotion poster for the VEX Robotics program. I included the core positions of VEX: robot driver, builder, and programmer. While designing this program, I also made sure to include the most valuable lessons of VEX, such as learning how to innovate new ideas and collaborate with others. I hope that this poster inspires excitement and sparks interest in the VEX Robotics program for future participants!

-Grace Zhang, Team 39B Gogli
