

CCHS RECRUITMENT

Katie Stark and Gerald Kamer

7368M

Indianapolis, IN

Our team's poster was made with the intention of recruiting more members to our robotics team. Our goal when making this was for it to be visually appealing in a way that will attract younger members to join. We were reaching to be able to communicate our goals for the team in this poster in an organized manner. We attempted to be clear with our intentions for the team as well as the targeted audience. This poster was made all custom without templates on Canva. We took inspiration from various templates and tried to make our own unique design with our own aspects. The color palette we came up with was all taken from the different VEX team colors and the disk color. We also used small graphic icons to make the poster more detailed in what it was trying to accomplish.
