

POSTER DESIGN CHALLENGE REPORT

TEAM NO. 750R

SOUTH BRUNSWICK HIGH SCHOOL
SOUTH BRUNSWICK, NEW JERSEY

MEMBERS:

ADITHIYA G KARTHIK, DILAN PATEL, MOHIT SHAH,
ESHA VIGNESWARAN, ABHAYA AVALUR, VIGNESH SARAVANAKUMAR, TEJAS RAGHURAM,
ANIKA THAKUR, RAKSHNA RAVISHANKAR, MAYANK DEORAS,
VIVEK BANKER, YEGNA BODEPUDI, VIHAAN PARDESHI

Poster Design Challenge Summary Report

To 750R, VEX Robotics is more than just a competition. Robotics has helped each of us grow so much, both as individuals and engineers. Our hope is that many more students across the world will be able to experience similar growth, which is why we made our poster. When creating the poster, the first step that we took was brainstorming and discussing to decide which ideas we wanted to convey in our poster. We decided that the focus of the poster should be the many skills that the students were bound to gain, as we feel that these are invaluable skills that all students should have. The skills we decided to highlight were testing, documentation, building, programming, and driving. We also decided that, as this poster was designed to recruit more students, we should have a glowing title on it, calling for students to join VEX. To show the excitement involved in competition, we also included a statement on how the potential is limitless. Finally, so students could gather more information about VEX, we included a QR code linking to the VEX VRC website. When making the poster, to ensure the poster was as clean and professional as possible, we utilized technology, and made it using canva. After consulting with others, we made edits, and went through several iterations before reaching the final product. We believe that this poster truly exemplifies our passion for robotics, and we hope that it will inspire new students to join.
