Design/Design Process:

Since we are all new to VEX, we didn't know details to put on that involved information, so we resorted to a detailed design and inspirational quotes. We started with a pencil outline, and then colored it in. Only later on did we go back and add the pen lines and the 'brought to you by Capytech' logo in the corner. The point of the picture is to look at it, and everything sort of flows together, although I am unsure if we accomplished our goal, I am proud of the result.
