## Background on Pizza Party

Established in 1925, Pizza Party is a family-owned and operated business. This year, there is more demand than ever to try a slice of their famous pizza. In order to meet these demands, Pizza Party has to throw the pizzas to their customers to keep the line moving. Due to a building error, the competition works in the same kitchen as the chefs of Pizza Party.

## Script

Welcome to the pizza party hosted by 74177H Sloan Canyon Robotics

The restaurant is fully set up and ready for customers to show up at the party can begin but the four chefs are fighting about how many orders they can complete so they split up into two teams and fight to see who can complete more orders

On the left side, we have the red team and on the right, we have the blue team

In the middle, we have the pizzas that the chefs will deliver to the customers

In the top left corner, we have the blue team's delivery spot and in the bottom right we have the red team's delivery spot

In the bottom left and in the top right we have the order cards for the teams to fight over and the team that their order card is in his or her color they will get the point

To score the pizza they must throw the pizza out of the window and into the delivery zone

At the start of the game, the teams will have 15 seconds that they have to be blindfolded and they can't see then they will remove the blindfolds and go for a 1:45 then to decide the winner of the pizza party

At the end of the game, the teams that clean the most tiles will receive extra points

Will it be the red team, or will it be the blue team? Find out next time on [pizzabattles.com](http://pizzabattles.com)

The two drive-thru windows represent the field goals that the discs get thrown into.

[Canva.com](https://www.canva.com)

The pizzas represent the discs on the field. They get scored by getting thrown into the windows or laying under the windows.
