

JOIN A

ROBOTICS

TEAM!

BUT WHY?

Joining a robotics team has many perks!

- You get to learn, while having fun.
- You will be able to build, code, drive, and more!
- You could also get to work with different people.
- You get to meet new people who could become your good friend!
- You could learn things for your future, and become an engineer.

Some manual labor can be dangerous, so having robots do the work can save many lives, and impact societies.
