

JOIN ROBOTICS NOW!

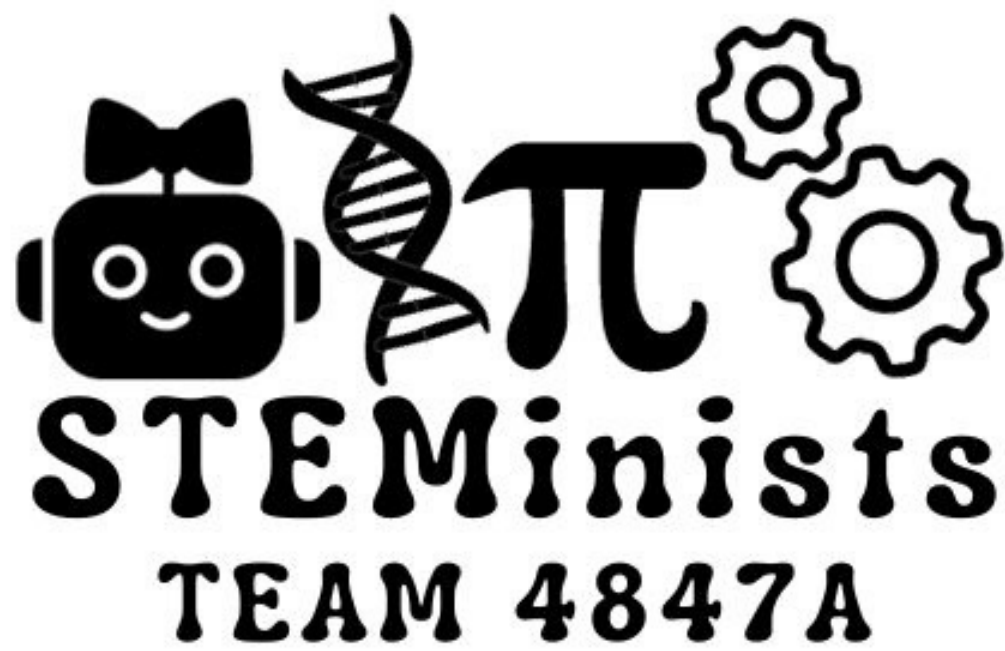

The STEMinists

**Abby, Asyiah, Hailey &
Rylan**

4847A

Elkview, WV

We used CANVA to create our poster. We want to use this to try and recruit other girls in our Girl Scout Troop to participate in robotics.

We wanted to highlight not only the competition but the fun and life long skills that we have learned all because of robotics.

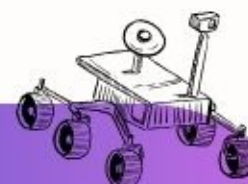

We used pictures from this season and clip art available in CANVA.

JOIN ROBOTICS NOW!

WHAT IS VEXiq?

VEX IQ is based on plastic, snap-together pieces specifically designed to build highly functional robots. This system doesn't require any prior knowledge in robotics. Students can easily build their first robot, and the wide variety of additional parts means that they can build anything they imagine as they continue to learn.

COMPETITION

While participating in competitions is great fun the most important thing to come from competitions is meeting new teams from all over our state! We are able to showcase the talent of our own team all the while learning from other teams. The sharing of ideas and the fostering of friendships is the real prize!

SKILLS FOR SUCCESS

While it may seem like all fun and games the skills that we are learning will last us a lifetime! We are learning how to work together to solve problems. We are also learning how to multitask, organize and communicate effectively all skills that will serve us long after robotics season is over!

DID WE MENTION THE FUN?

Robotics allows us to challenge ourselves in a fun and supportive environment where every voice is heard! Where being a girl is not a negative! We build, modify and drive our robots to success on the field - just as we build, modify and drive ourselves to success in all that we dream of!
