

DELIVERY DRONE WORKERS

Cadence O'Neill ● 35640B ● Hartselle, AL, 35640

Qualifications

- Must have a drone pilot license or have the ability to acquire.
- Ability to fly a drone and use the associated blast design software.

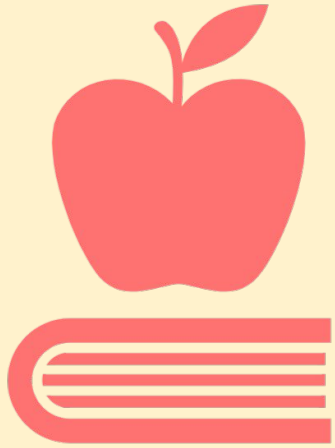

WHY?

The purpose:

The purpose of a delivery drone is to deliver packages containing medical supplies, food, or other goods.

WHAT?

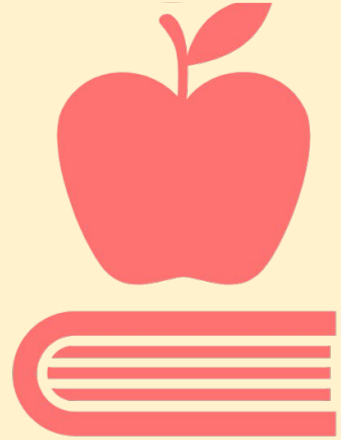

Amazon Prime Air, UPS Flight Forward, and Flytrex are just some of the businesses that use delivery drones .

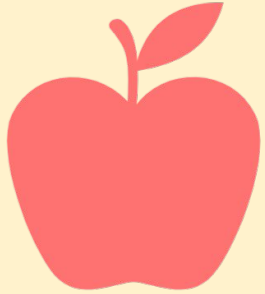

WHO?

Jeff Bezos was the one who had the idea of a delivery drone. This later gave him the title of “the founder of Amazon Prime Air”.

WHERE?

Delivery drones originated in the military. They are used to stay away from enemies and deliver supplies.

WHEN?

The logo for Amazon Prime Air, featuring the word "amazon" in black with a curved arrow underneath, followed by "Prime Air" in blue.

amazon
Prime Air

In December 2013 Amazon, being the first to use delivery drones, announced that they were planning a new way to deliver their packages.

WHAT DO THEY DO

Drone delivery workers fly drones from retailers to customers' houses. The drones might also be programmed to run autonomously by the worker.

Benefits

Some of the benefits of delivery drones are sustainability, access to remote areas, speed, cost savings, and more.

- sustainability - drone-assisted delivery reduced carbon by 24.90%
- access to remote areas - drones can reach hard-to-reach areas
- speed - drones are proven to be faster than cars or trucks
- cost savings - companies can save money for not having as many workers

Thanks to the REC Foundation

The REC foundation is helping kids like me to learn about the engineering design process and STEM. Becoming a drone pilot during your childhood helps children become great things in life!
