

NASA scientist

By-Caleb M, Matthew P, Matthew G, Oliver F, and Sam H.

Team 81101D
Mankato, MN

Why did you choose this career

We chose this stem career because we enjoy the idea of space exploration and a NASA scientist would be very interesting to research.

What is a NASA scientist

A NASA scientist conducts research for the earth about the earth and about space where they conduct research about other planets and how things in general react to space and so much more.

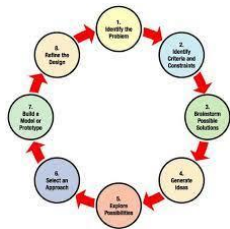

How does this job relate to STEM

A NASA scientist use STEM every day to help them learn about our ecosystem.

How does a NASA scientist use the engineering design process

The first start with thinking of a problem that we are struggling with and does experiments to solve the problem and once the got the answer they show the results to someone who can translate that to add it to our world

How does vex help prepare people for this career

Vex helps develop people's communication skills and help them use the engineering design process and vex has a lot to do with STEM.
