

1064B

Omaha North High School

Omaha, Nebraska

Perfectly Flawed

This poster was made to give an example of what robotics offers. The 4 main skills robotics teaches us are communication, teamwork, problem solving, and time management. The tool that we used to help us create the poster is Canva. We wanted a template that would use many different photos to be able to highlight our season so far. We used many photos that demonstrated the 4 main skills that we have learned through our years of robotics. We hope that this poster will encourage kids to see that robotics is fun and gives you several life lessons.
