

Title: Teamwork and Fun: Our RoboGenius Team 1810A

Names of students: Nadine, Henri and Abigail

Grade-2

Team number: 1810A

Team name: RoboGenius

Location of team: Lutherville Timonium, Maryland, USA

Description: Hi everyone! We're the RoboGenius Team 1810A, a super fun group of 2nd graders. Look for us in our cool, swirly orange tie-dye shirts at the robotics competition. We can't wait to show you our awesome robot!

I'm Nadine, and you'll see me in the middle. I help build our robot and drive it in the games. Next to me is my friend Abigail. She's great at making plans, building, and driving our robot too, making sure it goes just where we want. And then there's Henri, he's really smart and helps build and drive our robot, thinking of clever ways to score.

We love working together and having tons of fun. Our picture shows us all smiling big – that's because we love playing with our robot and seeing it do cool stuff. We're not just a team; we're really good friends who help each other and learn new things all the time.

Here we are, the RoboGenius Team 1810A, all ready for adventure and learning as much as we can about robots. We're like little detectives on a special mission, trying different ideas to figure out things that are a little tricky, and we're super excited about all the cool things we're going to find out!
