

Title: The Angle of Teamwork

Students: Jonah, Nicholas, Olivia

Team: 91343F

Location: North Hills, CA

The Angle of Teamwork

Our team is unique because we have different races, ages, grades, and even different ideas. Our team really is special. We even have twins on our team. Just like in the matches, we work with different schools. We work together to learn and grow. All our differences are like the parts of a robot. Without all of us we won't do as good so we all work together so we can be a better team.
