

ROBOTICS MAKES US

Hi my name is Braydon Suderman. I am the creator and owner of this magnificent poster. I chose the Poster design challenge because I wanted to do something that brought me joy and pleasure. While this poster did take me a week to make, I enjoyed every little bit of it. At first, I had no idea what I was going to make the poster about, then I thought about what makes ME, me. Robotics was the first thing that came to mind. So I decided to base the concept of my poster off of what makes ME, me. The random words that are floating around aren't random and are not there to fill up the poster or to make it look pretty. They all have one thing in common. It's what I and everyone else feels when we do robotics. Were excited, happy, joyful, we feel like we were at home. We're talking with one another, we're growing and developing, that's what robotics is all about! This poster has really helped me express how I feel about robotics and I hope it will make other people feel the same too!.
