

# Being a Leader

**By:** Silas Mee

**Team:** 1010Z

**Location:** Vancouver, BC, Canada

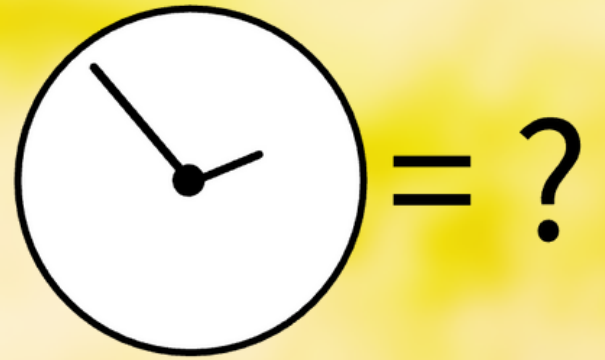

**Description:** This poster is designed to be catered towards potential future students, mentors, and supporters to get involved with Vex. As such, this poster follows a more general theme when compared to other posters, which gives this poster aspects of uniqueness and originality.

**Design Process:** This poster began with a title, which provided the central theme that continued throughout the creation of the poster. Then the remaining images and text were created, to piece together the space that the images and text could take up without clashing with each other. Afterwards, the background was created, which was chosen to represent the text and images as separate ideas that holistically represent one central idea stated, in the center of the poster, as the title. Then lastly, the Vex logo was added in the top-right and Vex was mentioned in the title.
