# DESCRIPTION

## OUR TEAM

We are Team 1258V: Continuum Robotics. This is our first year competing in High School VRC, but we have five years of experience in Middle School VIQC.

## OUR POSTER

The goal of our poster is to inspire other students and adults to get involved in VEX Robotics. The three main aspects we focused on are "Learning: STEM, "Growing: Life Skills, and "Enjoying the Experience". We utilize a combination of words, graphics, and images of our team to present the benefits of participating in VEX.

## OUR PROCESS

To make our poster, we started by brainstorming the reasons we appreciate and enjoy robotics. Then, we wrote our ideas down. Lastly, we used Canva to design and organize our thoughts into one aesthetically-pleasing, cohesive poster.
