

POSTER DESIGN CHALLENGE

QUEEN ELIZABETH'S BOYS SCHOOL, LONDON, UNITED KINGDOM

TEAM HYBRiX - 21549E

This is our first year competing in the VEX iQ tournament. We all signed up as we felt VEX would be extremely fun. Now, after a few months of participating in the VEX competition, we felt that we really enjoyed the different roles during the process of creating a robot. Therefore, we focussed on the 4 main aspects of what VEX iQ is all about in our poster:

1. Designing
2. Building
3. Programming
4. Competing

The aim of our poster is to show everyone what we as a team like about VEX. We aspire to make more people join VEX. As a result, by telling everyone what we like about VEX, they would want to join after seeing how enjoyable the experience is.

The Process:

Firstly, we brainstormed ideas about our favourite aspects about VEX iQ. Then we used Canva to put all our ideas into a poster. After that, we asked our mentors for advice and tweaked the areas which they suggested to improve our poster to effectively communicate our message.
