STEM ROBOTICS

WHY YOU SHOULD
JOIN!

Stem robotics competition

WHY YOU SHOULD JOIN!

Unity

When your at a robotics competition your there with your schools robotics unit, and with your team. You start to get comfortable and you start to enjoy your whole team as a family. Robotics gives you that family maybe its worth trying.

Your future

Vex robotics can give you a path into a great future, vex robotics is a watched “sport” by many good schools, you can go to a really nice school and have robotics on your record giving you a very high chance of a internship.

Driving

Have you ever learned how to drive a robot? Well it may be like using a controller and playing a video game but driving the robot takes skill and practice .If you cannot drive your own robot you cant compete and what is there to robotics if you dont compete.

Teamwork

Teamwork is essential to robotics, if you do not have a good relationships with your teammates you will fail, you all depend on each other and you all work together that is why teamwork is so essential.

Coding

Programming your robot takes skill just like driving, but its a completely different skill set. Maybe someone with the mind to code cant really connect his hands and brain in driving so he just sticks to coding.
