

Title: The Engineering Design Process

Created by: Daniel Dominick V.

Team: 83723B

Location: Montague Charter Academy Picoma California

Descriptive Text: I wrote down the engineering process to show how hard we work and to show if you want to be in robotics at Montague Charter, it's a big deal and you must at least have free time. It is very fun at robotics and you would have a party at the end of it, but if you're messin around you would be excused. We do alot of stuff at robotics, and it's really fun. I hope to see you there! :)
