

- Title: The job is Done!
- Names of students who participated : Ayan
- Team number : 9555C
- Location of team : Apex, North Carolina, USA

The poster is about our team, and our progress this season. We started with a robot that collected only 1 green block for the first competition. We built another robot that could pick 2 green block in our second competition, and we won the excellence award. For the third competition we used a lift mechanism to collect more blocks, and got an Inspire award. We are a proud team. Our only goal is to get better with each competition.
