VEX Poster Challenge

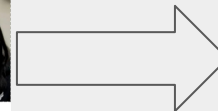

At Foothill High, our vision is a world marked by kindness and strength through teamwork. Establishments like Vex provide excellent opportunities for learning and collaboration. We aim to create a poster highlighting the significance of community in VEX robotics, emphasizing not only the knowledge gained in coding and building but also the enriching experience of competition, fostering friendships and healthy rivalries.

Our design process commenced by brainstorming the essence of VEX. Delving into what makes VEX enjoyable, we honed in on competition. From this, our three core concepts emerged: build, code, and community. Initial sketches and a broad vision guided us, considering an original idea of covering the entire poster with diverse collages. However, to avoid overwhelming visuals, we opted for simplicity, dividing them into distinct aspects. This resulted in a clean and comprehensible design, featuring a podium with “community” atop. We infused a catchy phrase to complete our final design.

Divide and Conquer

VEX
We Are The Future

But Together we
Prosper

VEX Poster Challenge

The three distinct components stand as players, each representing a unique facet of our opportunities. Positioned at the pinnacle of our podium is "Community," a tribute to the wonderful VEX community that forms its foundation. This element captures the spirit of collaboration and camaraderie.

Motivational words serve as a compelling reason to join robotics. We firmly believe that VEX cultivates the future generation of successful engineers, calling upon individuals with drive to unite and collaborate.
