

Title: More than a competition

Participants: Jose Santodomingo, Maryángel Borré, Belissa Briceño, Sergio Fonseca, Kevin Torregrosa

Team number: IQNOR1

Location : Barranquilla/Atlántico/Colombia

Description: This poster represents what VEX competitions means to us. We decided to crate a robot using an elevation bar with words and images related with VEX and everything that is involved with it.

In addition, there´s an energic crowd in the background to simulate a match.

The words selected are about materials or elements used in the robots, the differents rolls involved in a competition, the values that this type of events create in the participants, the effect of VEX in real life and those qualities and concpets related with this environment.

This poster was created in Canva but certain elements were created by our own in drawing softwares and clip studio.

Hope you like it <3.
