

Title: VEX: It's More than Robots

Students: Anna, Micah, Killian, Leo, Will, Tobin, Sarah

Team: 91343B

Location: Vintage Magnet Elementary School, North Hills, California

Description: In our team, we have students in 3rd, 4th and 5th grade. We would not have known each other if not for joining VEX. In the picture, it shows us being special because our team is able to pick each other up and stay positive. We support each other and work together to achieve our goals. We are focused but playful. We are smart but sporty. We are dedicated students but also "break takers." This picture shows our friendship. And it shows that VEX is more than just robots.
