Habs-SciClones   22903A

We are team Habs SciClones and we are located at Haberdashers Boys School in Elstree. Unfortunately, the photo that we have included does not include one of our members, Benji, who unfortunately could not attend the particular event where this photo was taken. Each of us have a designated role, which have been carefully selected by considering our attributes and strengths.

Benji (builder) – Benji is one of the builders and is always enthusiastic and curious when doing his job. He also helps out with online challenges and notebook.

Kayan (programmer) - Kayan spends most of his time on programming, using the variety of code blocks to make the most efficient code for our robot.

Rohan (online challenges + design board) – Rohan is the leader in the creative aspect, leading the development of the design board and working on the online challenges, as well as helping with the production of the notebook.

Joshua (builder) – Joshua is the core builder of the group. He is very dedicated and is very reliable when it comes to building the robot. He also helps out with the online challenges and notebook.

Ishaan (notebook) – Ishaan is the lead notebooker and spends his time at vex working on it to make our amazing engineering notebook.

Kian (builder) – Kian works hard when building, and despite being a new member his enthusiasm and mentality has brought a new energy to the team.
