

Title of Submission: Why I Love Robotics

Team Members: Lily Kate, Jayce, Seth & Chloe

Team Number: 35640A

Team Location: Hartselle, Alabama

Description: The poster was created using team and robot photos from our robotics team this year. Team members brainstormed and made contributions to the creative process by giving words and phrases that they associate with robotics, and what they like about robotics. After adding pictures to the poster to create a collage background, the title, words and phrases were added. Effects were given to the words to differentiate them from the background pictures.
