# Synergizing Success: Middle School and Elementary Robotics Teams Unite in Remarkable Teamwork

We are the CODE-A-ROBOT Team 2633A from Weston, FL. Our team works together as a close-knit family in which our middle school and elementary teams collaborate harmoniously. Our primary mission is to offer unwavering support and inspiration to our younger counterparts while positively contributing to our community. We wholeheartedly embrace their successes as our own and take great pride in celebrating their achievements together. In this particular photograph, we joyously commemorate their recent competition accomplishments, securing 3rd Place in Robot Skills and earning the prized Judges Award. It fills us with immense pride to know that we played a significant role in their success.
