

Poster Design Online Challenge - VRC
High School

Students Who Participated: Diya,
Chloe, Lily, Sana, Nishka, Aanya

Team Number: 842T

Team Location: Chester Springs,
Pennsylvania, 19425

We created this poster design using a software called "Canva". The purpose we wanted to convey through this design was how hard work pays off by displaying the highlight of the season; the VEX World Championship. To viewers, this is intended to showcase the skills and opportunity that VEX offers them. Additionally, the QR code is meant to take the user to the official VEX website where they can learn more about robotics.
