

- Title of submission: Robotics Teamwork=Fun
- Names of students who participated (using first names only is acceptable): Parker and Austin
- Team number :18865A
- Location of team: Slidell High School, Slidell, LA
- Description:

Three separate robots, representing different aspects of robotics that we enjoy. Drones are robotics that deal with flight and making such a thing possible requires a creative and open mind. They also represent the new heights that robotics work toward and achieve everyday through a multitude of efforts. The robot in the middle shows the complete side of VEX VRC where most designs are made from experience and each iteration of the robot becomes more and more efficient in the goal of getting points. The final robot is more of a showing of how far robotics has come. Today, with a small amount of parts and almost no experience, anyone can create a robot that can race around safely and swiftly. In conclusion, robotics teamwork equals fun.
