

Online Challenge 2024

Photography Challenge - Elementary School

Team 727B: Brainy Blockbusters

Team Members: Bennett H (age 10), James B (age 9)

Engineering the FUTURE. Design - Build - Achieve!

Most man-made things we see around us began with an idea in someone's mind. This idea was put down on paper, tested and then created. We are creating the future!

About us

We are a 2-person team, this is our first year in VEX IQ. We spend a lot of time working on our engineering notebook when we meet for practice. Friendship "bonds" us like glue. We both have brothers in other VEX robotics teams, we are the little brothers club. 😊 We work hard and have a ton of fun!
