

What Makes VEX Robotics Great?

Lucille Schwartz, Erik Larson, Corbin Gray

Team 56426A

Rockford, IL

The main objective behind the creation of the poster was to convey the positive impact that robotics has had on our lives. We aimed to showcase the uplifting ambiance that this field offers, along with the camaraderie and strong bonds that are formed among peers during robotics competitions.

The poster was designed to serve as a recruitment tool that would capture the attention of passing students and encourage them to join our robotics team. To achieve this goal, we opted for a cloud perimeter around the title, which symbolizes the limitless possibilities and potential that robotics has to offer.

Our goal was to highlight the immense fun and excitement that we experience as a team, and to communicate the sense of community and belonging that comes with being a part of this team. Overall, our hope is that the poster will inspire more students to explore the world of robotics and join us in our mission to innovate and create.
